

DynaMedex™

The most current and comprehensive clinical information available

With DynaMedex you get the latest evidence-based information available to make complex decisions at the point of care.

EBM fundamentals

DynaMedex adheres to the **evidence-based medicine (EBM) fundamentals** framework to carefully curate clinical recommendations and clearly define the evidence.

Informed Updates

Know exactly when an update was made, or when a topic was last reviewed.

Continuous literature surveillance:
DynaMedex is updated up to **six** times per day.

Personalized alerts — Never miss an update.

Follow your medical specialty to get a constant feed of various update types including:

Algorithms

Potentially practice-changing updates

Study and guideline summaries

Recommendations

Drug/device alert

Outbreak alerts

Evidence updates
