

EBSCO Faculty Select™

Drive textbook **affordability, access,** and **usability** for faculty and students.

EBSCO Faculty Select™ empowers academic libraries to directly support textbook affordability efforts at their institutions. Through a single, easy-to-use interface, faculty can easily find and access quality Open Educational Resources (OER) to support their courses, and search and request access to relevant e-books from top academic publishers. Librarians can then order requested e-books through their preferred acquisition workflow – ECM (EBSCOhost® *Collection Manager*) or GOBI®.

Help faculty leverage **free open materials** and **low-cost library-licensed** resources and reduce the cost burden for students.

EBSCO Faculty Select helps libraries to:

- Provide course materials for adoption that are no cost to students
- Streamline access to high-quality Open Educational Resources (OER)
- Enable faculty to search and request access to high-quality e-books
- Meet institutional or state-level mandates surrounding textbook affordability
- Drive usage and value of library materials and directly support course curricula
- Improve access to course content for students
