## ***Social Work Reference Center™***

Created by a multi-specialty editorial team, *Social Work Reference Center* is a turnkey information resource for social workers and mental health professionals. It covers a wide array of topics such as adolescent health, aging, end-of-life care, clinical social work and diversity. Content is organized in a way that makes it easy for users to get answers to questions quickly and easily.

### ***Social Work Reference Center Helps Users...***

- Increase speed and accuracy of decisions at the point of care
- Meet continuing education requirements
- Ensure treatment decisions are made based on the most current evidence
- Improve safety by reinforcing competencies
- Easily access premier social work and medical journals
- Provide patients with patient information materials

### ***Information You Can Trust***

*Social Work Reference Center* is written by a respected editorial faculty that creates content using a strict evidence-based editorial policy focused on systematic identification, evaluation and consolidation of the most current clinical research.

Our goal is to support social workers and mental health professionals in their decision-making process by providing objective and unbiased information so they can make the best decisions for their patients.

### ***Social Work Reference Center Content Types***

#### ***Evidence-Based Quick Lessons***

Evidence-based quick lessons are summaries of common conditions which include information on causes and risk factors, contraindications and precautions, assessment and care plans, desired outcomes and outcome measures, best practices, and prevention.

## Evidence-Based Methodology

1. Systematically identify the evidence
2. Systematically select the best available evidence from that identified
3. Systematically evaluate the selected evidence (critical appraisal)
4. Objectively reflect the relevant findings and quality of the evidence
5. Synthesize multiple evidence reports
6. Derive conclusions and recommendations from the evidence synthesis; obtain peer review
7. Change the conclusions when new evidence alters the best available evidence

## Social Work Reference Center Content

### Types Continued

#### Evidence-Based Care Sheets

Evidence-based care sheets are summaries of the best and most current clinical data applicable to specific diseases and conditions. All evidence is evaluated according to a strict evidence-based methodology to ensure the best and most current evidence is presented.

#### Continuing Education Modules

Continuing Education Modules are designed to help social workers and mental health professionals satisfy their CE credits online. Each CE module consists of course material, an interactive review and a competency test with a certificate of successful completion.

#### Practices and Skills

These topics detail the necessary steps to achieve proficiency in a specific clinical task, including competency checklists which can be used to determine proficiency in performing needed skills.

#### Clinical Assessment Tools

Clinical assessment tools are designed for assessing a client through devices used for measuring a given phenomenon (e.g., pain or coping). These can include interviewing, research tools, a questionnaire or a set of guidelines for observation.

#### Drug Information

*Social Work Reference Center* offers extensive drug information from AHFS Drug Information Essentials.

#### Journals

Full text from top social work and psychology journals can be included in *Social Work Reference Center* search results.

#### Patient Education Handouts

Patient education handouts are easy-to-read handouts, include detailed medical illustrations, and are available in both English and Spanish.
