 EBSCO Discovery Service

Your library is about more than books. Connect your patrons to your library's entire collection.

Libraries connect neighbors and families to free educational resources and to each other.

Users want information on health topics, retirement, car purchases—you name it. The library offers this type of content.

With the right discovery tool, the library becomes a powerful online research center that patrons can access from anywhere for free.

EDS takes your catalog, your databases, your music files, and any type of digital content and makes it available to your users through a single search.

Public libraries are the pillars of our communities. EDS delivers a cost-effective search tool that plugs your patrons in to your e-resources. With EDS the usage of your online resources improves. Your patrons will keep coming back, not just to your brick-and-mortar library but to your online research hub.
