

EBSCONET® Subscription Management helps you work more efficiently so you can save time and money.

With EBSCONET Subscription Management, you can...

Manage Subscription Workflows in One Central Location

Simplify each step of the subscription management process—title selection, ordering, e-access activation, claims, renewals, and evaluation—all within a single, intuitive online platform.

Choose the Resources You Need

Pricing and access options are available for more than 355,000 titles from almost 100,000 publishers worldwide. Extensive title details, including bibliographic data, available formats, and publisher package information, are all updated in real time to make your selection process more efficient.

Analyze and Evaluate Your Collection

A wide variety of reports and online tools allow you to stay abreast of changes to your collection, track e-journal registration, activation, and licensing, and analyze expenditures, usage, and subject coverage.

Renew All Content with Ease

Handle renewals for e-journals, e-journal packages and print subscriptions via *EBSCONET*. Our *E-Package Renewals* tool allows you to easily make changes to your package title list and track spend in real time while ensuring that contract terms are enforced.

Eliminate Duplicate Work

A high level of integration among EBSCO's management and discovery tools and with your integrated library system makes subscription details available when and where you need them.

Access full bibliographic information about titles, in addition to order history.

Compare available formats for each title.

Find access and registration information, license details, and more via easy-to-navigate tabbed interface.
