

What does it take to build the best research solution for your users?

RESEARCH SOLUTION

CONTENT

Internal Repositories

Access vital internal documents in addition to paid content.

Catalog

Loading your organization's owned catalog creates a deeper and unified research experience.

Comprehensive Full Text

Seamless access to full text provides researchers with a complete picture for their work.

Quality Subject Indexes

Provide a depth of coverage and a level of indexing for important resources, connecting researchers to critical information.

TECHNOLOGY

Seamless Authentication

Employ Single sign-on technology to save time and to support researchers' authentication needs.

Content Management System

Start research off right by providing users with a responsive content management system and portal to create a seamless web experience on any device.

Modern Search Platform

Meet researchers' expectations with a single search discovery platform providing valuable information in just one click.

Accurate Relevancy

Information is only good if the most relevant is returned in your search results.

The EBSCO research solution supports the need of researchers to easily unearth critical information through a streamlined research portal, an integrated discovery and search platform, and authentication technology.
