Complete Online Package™

Help students and educators achieve success with EBSCO's *Complete Online Package*, a vast collection of full-text reference resources for high schools.

Available via EBSCO*host*® or *Explora*™, EBSCO's engaging and easy-to-use school interface, these six databases are designed to support student research and classroom instruction.

Complete Online Package includes the following databases:

For Students

MAS Complete™

Designed specifically for high school libraries, this resource contains complete articles from hundreds of popular high school magazines and reference books, as well as thousands of biographies and primary source documents. The content covers a wide range of subject areas such as art, history, sports, music, film, travel, science, technology, fashion, religion, nature and current events. Magazines include T*IME, Newsweek, The Nation, National Review, Discover, Scientific American, Science News* and many more.

Consumer Health Complete™

Offer health and science classes this well-rounded collection of articles, images and animations about a variety of health-related topics such as diabetes, cancer, nutrition, exercise and much more.

Newspaper Source Plus™

Ideal for social studies, business and government classes, this database includes more than 83 million complete articles, including those from more than 1,200 of the world's major newspapers and 160 newswires. Also included is *News View*, a feature that provides daily news updates and a collection of more than 1.9 million television and radio news transcripts.

TOPICsearch™

Teachers, librarians and student researchers can use this database to explore current events; social, political and economic issues; scientific discoveries; and other popular topics frequently discussed in the classroom. *TOPICsearch* contains more than 90,000 complete articles from diverse content sources.

For Educators

Education Research Complete™

Designed for educators, administrators, and those seeking professional development resources, this bibliographic and full-text database covers scholarly research relating to all areas of education such as curriculum and instruction, administration, policy, funding and related social issues.

ERIC®

The *Education Resource Information Center* (ERIC) provides access to educational literature and resources. The database contains more than 1.6 million records, links to hundreds of thousands of full-text documents, and includes an education-specific thesaurus.
