

At a Glance:

How DynaMed Benefits Your Evidence-Based Practice

Stay abreast of the latest clinical developments

Approx 50 million

The number of medical and scientific publications available in public databases

30

A new medical or scientific publication is released every 30 seconds

Staying current on recent developments isn't an easy task. At-a-glance insights, real-time updates and alerts for practice-changing amendments make sure you don't miss important new information.

All you need at the point of care, right at your fingertips

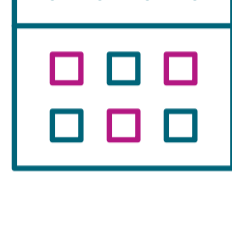

Time spent by healthcare practitioners seeking answers to their questions.¹

Less than 3 minutes

Integration in your EHR provides quick and easy access and the remote access options and free mobile app bring all the information you need at the point of care at your fingertips.

DynaMed supports you in your busy workday by providing quick answers to clinical questions. A search in English immediately leads to information on conditions and drugs. Relevant images are presented in a separate tab.

Relevant quality content for a wide range of specialties

Over 10,300 topics

More than 22,000 clinical practice guideline listings

Approximately 7,800 images, most of which curated into context

More than 650 clinical calculators

36 specialties

Micromedex content in DynaMed includes summary level drug information such as: drug dosing, single interactions, evidence of off-label user, lab recommendation and summary level IV compatibility screening.

Seamless access to summary level Micromedex content on over 5,000 drugs at the point-of-care.

Extensive drug interaction checker

DynaMed provides interaction information of drugs and herbs vs. other drugs and herbs, ethanol, food, lab tests, tobacco and lactation.

For physicians, by physicians

450

The number of physicians around the world that write or peer-review DynaMed content.

125

The number of physicians and scientists on the DynaMed staff.

Evidence-based editorial process means the best information

A strict seven-step evidence-based editorial process is the foundation underlying all DynaMed content. Conclusions, guidelines and recommendations are written and updated based on objective and systematic monitoring of a wide range of high-quality literature sources.

Currently, over 100,000 evidence and guideline summaries are presented from over 3,500 journals and guideline organizations from across the globe.
