At a Glance: How DynaMed supports your Institution’s success

Reduce costs and improve patient outcomes by providing your medical team with the latest clinical information.

DynaMed offers

- Real-time and current evidence-based information quickly updated daily and based on a peer-reviewed methodology and systematic literature searches. This helps reduce medical errors and unnecessary tests, reducing costs and improving patient outcomes.

- An easy-to-use interface and a sophisticated search engine that makes it easy to find accurate and actionable information, reducing variations in care and optimizing patients’ satisfaction.

- Easy access to clinical information, anywhere, anytime via a intuitive mobile app (included in subscription), offline or remote.

- A point-of-care tool that seamlessly fits into the electronic workflow with features such as EHR integration, helping your time-strapped clinicians to reduce time to find clinical answers.

Your team of medical professionals meet great challenges everyday.

How can your medical team make sure they always use the latest clinical evidence with one click of the mouse, within just 30 seconds?

At a time when research overload, when too many questions are asked, it can be hard to keep up with the latest findings. How can your team quickly find the latest research information to best support your patients?

A study of U.S. medical residents estimated that about 30% of patient questions are based on outdated information when asked by a patient. How can you make sure that your medical team has the latest, most relevant evidence-based information at their fingertips?

DynaMed provides your staff with all they need at the point of care, right at their fingertips. Discover how this evidence-based tool can help your institution.

Time to focus on the patient, not the search for answers.
