Stimulate evidence-based practice in medical education

The best clinicians learn from great teachers – and use the right tools.

63%

Estimated percentage of US internal medicine residents that used an Internet search engine to identify evidence at least daily.

Wouldn’t we prefer they’d use an evidence-based tool with information?

Dynamed helps medical students frame clinical questions, and provides fast, accurate and actionable evidence-based answers to these questions.

Currently, over 100,000 evidence and guideline summaries are present

from over 3,500 journals

The full-text of the original research is available in one click.

Targeted synopses, clearly defined recommendations, and concise presentation of each topic provide direct insight and key takeaways.

Approx 90 million

The number of medical and scientific publications available in PubMed databases.

A new medical or scientific publication is released every 20 seconds

Staying current with the latest clinical evidence isn’t easy. Not anymore. Dynamed provides relevant evidence for practice-changing amendments and ensures you don’t miss important new information.

The Dynamed mobile app provides all of the above at your fingertips anywhere, anytime.
