

# Easy Access On-The-Go with the *Dynamic Health*<sup>™</sup> Mobile App

DH

Take *Dynamic Health* with you on your tablet or smartphone anywhere you go. With the *Dynamic Health* mobile app, you will have easy access both online and offline to a wealth of evidence-based information to help you master critical nursing and allied health skills.

## To Install:

1. Begin by downloading the *Dynamic Health* app from the iTunes or Google Play app store.
2. Now you need to authenticate the app. There are two options for authentication.
  - **Log in Via Your Institution's Network:** Tap Institutional Network and then tap Authenticate to log in to the app if you are connected to your institution's Internal Network or Local Internet via Wi-Fi. Please note, this authentication type must first be enabled by your institution.
  - **Sign in with Your Personal User Account:** Enter your personal user account credentials and tap the Sign In button. Please note: Personal User Accounts are not available to all users.
3. After you log in, you are prompted to install via one of the following options:
  - **Partial Install: Store text and image thumbnails on your device.** Full images are available when you are connected to the internet. This option helps you save space on your device.
  - **Full Install: Store all *Dynamic Health* content on your device.** You do not need to be connected to the internet to access content on the app. Please note: Video content requires a network connection to view.
4. Your device is ready to go!
