Clinical Decision Support

Healthcare is a fast-paced field with high stakes. When your physicians, nurses, advanced care providers and allied health professionals have a question at the point of care, they need an answer they can trust, and they need it fast. EBSCO delivers.

Evidence-based resources help improve patient outcomes and quality of care.

DynaMed®

DynaMed is a cutting-edge, evidence-based clinical information resource designed to provide busy clinicians with the information they need – when, where and how they need it – supporting clinical decision making and improving patient outcomes.

Dynamic Health™

Dynamic Health is an innovative evidence-based resource that helps nurses and allied health professionals master critical skills. Users can find current, actionable information about core nursing competencies, transcultural care, patient training, occupational therapy, speech therapy, nutrition and dietetics, social work and so much more.

Option Grid™ Decision Aids

Option Grid decision aids are brief, easy-to-read tools that help patients and providers compare healthcare options. Content is developed using the most current evidence available and is focused on the questions patients most frequently ask when they need to make preference-sensitive decisions. Providers can select two to three options to compare, and for select topics, fill in patient-specific data to customize the grid.

Isabel

Isabel is used by physicians around the world to help construct or broaden a differential diagnosis. By entering the information normally captured in a patient workup, physicians are provided with a list of possible diagnoses to help them make an accurate final diagnosis quickly and easily at the point of care.

Nursing Reference Center™ Plus

A nurse's time is a prized commodity, and in order to provide the best care possible, they need to quickly find the right answer to their clinical questions every time. Unmatched in scope, nurses turn to *Nursing Reference Center Plus* for all their practice, education and research needs.

HealthDecision®

HealthDecision is a software platform of evidence-based clinical decision support tools that help clinicians and patients engage in effective shared decision-making, leading to improved patient satisfaction and quality outcomes. It offers guidelines, customized patient handouts and seamless integration into the clinical workflow through the Electronic Health Record.

Research Databases

The landscape of medicine is constantly changing, and your clinicians and researchers need to stay current with the latest clinical evidence from top-tier clinical literature.

Database content is curated and classified by experts in the medical field.

CINAHL® Complete

Support your nursing staff with *CINAHL Complete* delivering fast and easy access to top full-text journals, evidence-based care sheets, quick lessons and more. It is compatible with EBSCO's point-of-care resources including *Nursing Reference Center Plus* and also allows nurses to earn valuable CEUs.

Global Health

The database from CABI covers all aspects of public health at both international and community levels, as well as a wealth of material from other biomedical and life science fields.

Health and Psychosocial Instruments (HaPI)

Produced by Behavioral Measurement Database Services, this bibliographic database is abstracted from hundreds of leading journals covering health and psychosocial sciences.

MEDLINE® Complete

Essential for doctors, nurses and health professionals, *MEDLINE Complete* is a full-text database that provides access to more than 2,200 top-tier biomedical and health journals, features MeSH (Medical Subject Headings) for more than 5,200 current biomedical journals and covers subjects pertinent to medical professionals engaged in clinical care, public health and health policy development.

PsycARTICLES®

Delve into the science of psychology and behavior with *PsycARTICLES*, the database of full-text peer-reviewed articles published by APA Publishing and affiliated journals.

PsycBOOKS®

Significant in scope and depth, this database offers the most current and only comprehensive collection of full-text scholarly and professional books published by APA Publishing and provides a pathway through the evolution of psychological thought.

E-Books and Journals

These resources are the perfect complement to EBSCO Health research databases and clinical decision support tools – providing users with the full spectrum of healthcare related content.

Enhance your collection with access to e-books, audiobooks, journals and magazines.

EBSCO eBooks™

EBSCO eBooks offers a wide variety of e-books for use in clinical settings, biomedical libraries and academic-medical institutions. With topics ranging from surgery, pediatrics, pharmacology, general practice and nursing, to administration, infectious diseases and more, there's something for every discipline. Ask an EBSCO representative about the growing collection of DRM-free e-books that offer a flexible, easy-to-use experience with no sign-in required; no restrictions on printing, saving or downloading; and no limits on compatible devices or apps.

EBSCO Audiobooks™

Audiobooks are the fastest growing segment of the publishing industry, and EBSCO is proud to offer healthcare professionals and clinicians access to more than 110,000 selections from top authors like Michelle Obama and Kamala Harris on key topics such as leadership, team building and more. Personal and professional growth is vital to success in the healthcare industry, and audiobooks allow busy professionals to gain a new perspective or delve deeper into an industry subset while multi-tasking and commuting.

Flipster® Digital Magazines

Flipster delivers more than 1,500 popular magazines including top picks like *Prevention*, *Consumer Reports on Health*, *AARP* and more that health professionals can access 24/7 from their laptops or mobile devices. Plus, *Flipster* offers stress-reducing resources such as adult coloring books that clinicians will find relaxing, enjoyable and a welcome break from workplace stress.

GOBI® Library Solutions from EBSCO

GOBI is your online source for finding the latest medical, clinical, nursing and allied health print books and e-books, including Doody's Core Titles and Rittenhouse e-books. Choose from multiple e-book platforms and purchasing options, and benefit from duplication control across all formats and customized cataloging records. Let GOBI Library Solutions help your library deliver the books your users want in the format they need.

Journal Subscription Services

EBSCO provides subscription management services for e-journals, e-packages, and more. EBSCO maintains the most complete and accurate title file in the industry with more than 360,000 titles from more than 98,000 publishers worldwide. *EBSCONET® Subscription Management* simplifies each step of the subscription management process – title selection, ordering, e-access, activation, claims, renewals, and evaluation – all within a single platform.

Software as a Service

The SaaS Suite for medical research is designed to bring together the best in content, technology and user experience to transform the way medical research gets done.

Streamline access. Save researchers time. Stop wasted effort.

Stacks Research Portal

Build a scalable and customizable single-point portal to make research more streamlined and intuitive. The Stacks portal helps to increase usage of your medical library's content, cultivates collaboration within teams and allows you to create a specific user interface based on the department or team, and the best part? You can build, create and maintain it all on your own without IT.

EBSCO Discovery Service™ Health

Direct connection to the most relevant medical content is what matters most to researchers. *EBSCO Discovery Service Health* is an advanced discovery search platform that delivers the right content – every time, no matter where research is being conducted.

OpenAthens

A partner of EBSCO Health, OpenAthens provides unrivaled single sign-on technology, simplifying access to your organization's electronic resources. With a single username and password, your users get access to all your subscribed resources, whenever they want and wherever they are. OpenAthens technology is based on SAML single sign-on standards which transmits user data in a very secure manner.

EBSCO Health offers evidence-based solutions and tools that help improve patient outcomes.
