

# Preparing Canada's students for success

- in school, in college and beyond

The provinces and territories of Canada are committed to helping their students achieve personal and academic success with education programs that teach students to become creative, responsible, actively involved citizens who are prepared for the challenges of today's ever-changing world.

To support classroom instruction, student research and the integration of information and communication technologies in schools across Canada, EBSCO's databases feature reliable, high-quality content from a variety of popular and academic sources. These resources cover a vast array of subject areas and support many of the learning outcomes set forth by the provincial ministries of education.

## Integration of 21st Century Information and Communication Technologies

- Colorful, user-friendly interface (*Explora*<sup>™</sup>) with advanced search and retrieval options to help students quickly locate relevant resources and get started with research
- Easy access to online resources anytime, anywhere, from any computer or mobile device
- Google integration, allowing educators to quickly share content to Google Classroom and students to save articles to Google Drive
- Ability to export citations to NoodleTools, EasyBib and other bibliographic management platforms

## Resources for Developing Multiple Literacies

- Full-text articles from a variety of source types that:
  - facilitate close study of text structures
  - reflect multiple perspectives
  - encourage critical and creative thinking
  - promote intercultural understanding
- Multimedia content, such as maps, graphs, charts, images, audio recordings and videos

In addition, EBSCOhost<sup>®</sup> is the most widely used research platform in academic institutions around the world. Using EBSCO's resources in support of your school's curriculum will ensure that graduates are well-prepared to excel with projects and research in the university environment.
