</table>

- **Full Text**
  - Full-text searching is useful for completeness and EDS contains more full-text academic materials than any other discovery service.

- **Subject Indexing**
  - Subject indexing can allow a sophisticated search engine to provide better matches at the top of the result list.

- **Customization**
  - From discipline-specific support to catalog integration, customization can be key in delivering the right content to the right person at the right time.

- **ILS Partnerships**
  - Partnerships with ILS providers allow library end-users to have easier access to the breadth of content and resources their libraries provides.

---

**Did You Know?**

**Extend Your Catalog**

EDS customers can build upon the collection by including metadata from their own unique collections, including their catalog (OPAC), Institutional Repositories, databases, archival collections and more.

**Subject-Specific Research**

EDS not only provides comprehensive coverage of each subject area, but also provides the highly-refined and robust indexing needed for in-depth academic subject-specific research.

---

**Top Difficulties in Conducting Research**

- ** Evaluating the best resources for my paper:** 41%
- **Writing my paper:** 18%
- **Structuring my paper (outline):** 16%

---

“EBSCO brings the latest technology to our students. It shows in the quality and relevance of search results. Our students can find information easily and access full text smoothly – which saves the students’ time.”

- Young-Rak Kim, University Librarian
