

FULL-TEXT DATABASE

Content Includes:

1,200

active full-text, non-open access journals

560

active full-text, non-open access journals not found in *MEDLINE with Full Text*

760

active full-text, non-open access journals not found in any version of *Academic Search®*, *Health Source®* or *Biomedical Reference Collection™*

5,200

journals indexed with searchable cited references

MEDLINE® Complete

The Essential Resource for Biomedical Research

MEDLINE Complete is the largest companion to the *MEDLINE* index, providing access to top-tier medical journals. Many titles are available with no embargo, allowing access to the information as soon as it is published.

Unmatched Full-Text Coverage

With full text for leading medical journals, *MEDLINE Complete* is unmatched in scope. Covering an extensive range of subjects including biomedicine, pre-clinical science, health policy development and much more, *MEDLINE Complete* offers something for every medical researcher.

Content Users Can Rely On

Evidence is key when it comes to medical research, and with *MEDLINE Complete* users have access to an extensive collection of elite, peer-reviewed, evidence-based content they can trust.

An Optimal Search Environment

MEDLINE Complete provides an easy-to-use interface and powerful search functionality, enabling users to effectively search and retrieve information with widely known Medical Subject Headings (MeSH) created by the United States National Library of Medicine.

Ahead of Print Content

MEDLINE Complete now includes Ahead of Print content for key publishers, including Springer, Sage, Wiley, Taylor & Francis, Karger, DeGruyter and IOS Press.

Subjects Covered:

- Biomedicine
- Behavioral sciences
- Bioengineering
- Health policy development
- Life sciences
- Pre-clinical sciences
