

Novelist[®] Select

Enrich your library catalog

At Novelist, we take book recommendations personally.

Your readers' time is precious, and they want book recommendations they can count on 24/7. But when you're not there to help, do your readers have the guidance they need to find the right book? Does the information in your library's catalog represent the experience you want for your readers?

Novelist librarians create access points for readers based on terms that matter to them, such as a book's tone, an appropriate reading level for a student, and consistently applied subject headings. With On the Shelf, your readers will also know whether a chosen book is available.

Give your readers recommendations they can count on.

With NoveList Select, you'll get:

- ✓ **Meaningful read-alike recommendations**
We provide read-alike suggestions for books based on common subjects and similar tones, not superficial matches based on the same publication date or that both books happen to be classics or have won the same award.
- ✓ **Why a book is being recommended**
NoveList librarians make thoughtful, unique recommendations. Result: readers who love atmospheric historical fiction might be exposed to gothic fiction, but never a violent thriller.
- ✓ **Recommendations for title, authors, and series**
In addition to much-loved titles, we know that readers have favorite authors and series! Readers will love having recommendations for all three.
- ✓ **Reader-friendly access points**
Our story mixer makes it fun for readers to interact with NoveList appeal terms, genres, and themes. Results can be filtered to your library's collection, so readers can find a great book to check out or place on hold.
- ✓ **Audiobook recommendations**
We take audiobook lovers' listening expectations into account. Readers can find books read by their favorite narrator, books read by a full cast, or books performed in front of a live audience — the kinds of experiences that are important to listeners.
- ✓ **Reading level information**
NoveList makes it easy for readers to select 'just-right' books by putting Lexile® levels and Accelerated Reader information into your catalog. Readers can quickly browse by the desired level or range.
- ✓ **More of what matters to readers**
Real-time holdings information, curated reading lists, book discussion guides, links to e-resources, links to NextReads newsletters ... all in your catalog.
- ✓ **A great customer service experience**
Our support team wants to make sure that Select works for you the way that you want it to. From purchase onward, they'll guide you to make the best choices for your readers.
